How to use this Resource

This resource is an extension of the comprehensive and editable Word Problems resource. This resource is intended to be print friendly and low-prep. This resource includes all the songs and posters that the comprehensive Word Problems resource has. These worksheets can be used for fluency, as supplemental, or as the unit in its entirety. The number of worksheets allow for consistent opportunities to review and master word problem solving strategies for all types of word problems.

This resource can be utilized on its own, or as supplemental practice to the comprehensive Word Problems unit.

Multiple Uses:

- **As an individual resource:** Use the songs and anchor charts to teach basic word problems solving skills and strategies. Scaffold the unit by teaching problems to 100 first, followed by the problems to 100 test to gauge mastery. Then, move students on to the problems to 1,000 worksheets, and conclude the unit with the problems to 1,000 test.
- **As supplemental practice:** In conjunction with the comprehensive Word Problems resource, add in these additional practice word problems for fluency, homework, as a practice center.
- **As a year-long packet:** If you want students to maintain word problem fluency throughout the year, turn these worksheets into a word problems packet. Throughout the year, have students' complete worksheets in the packet to keep up their word problem fluency and maintain mastery.

Types of Story Problems

There are different types of story problems

In math that is certainly true

Different types of story problems

Let's start learning a few

Well, you can add to where you put numbers together and you get a total or sum

Or you can minus numbers and remain with less

And that's called taking from

There are different types of story problems

In math how do you know what to do

To figure out the type of story problem

You have to read and follow the clues

Sometimes it says to put groups together

And that's similar to adding on

Other times the groups are taken apart

We're left with less some are gone

There are different types of story problems

In math you have to read what to do

All the types of story problems

We have a couple more to work through

Comparing numbers is finding the difference

Is it more than or less we don't know

And sometimes we aren't even told at all
and that's an unknown variable

There are different types of story problems

In math now you've seen it too

And to know what type of story problem

Read closely follow all of the clues yahoo

Steps to Solve Word Problems

Intro

Well, there are

Chorus

8 steps to solve word problems.

(Eight!)

Use them all and be

(Great!)

There is no time to

(Wait!)

Come on now!

(Eight!)

Come on now!

(Eight)

Let's name all eight.

(Let's name all eight)

Can you name all eight?

(I can name all eight)

Verse

Now step number 1: Visualize the problem.

If you can see them in your mind, it makes it easier to solve them.

For step number 2: retell the problem. Say it in your own words
so, you can understand all of them.

Now step number three: Underline key words and circle key numbers.

Step number four: Determine what type of problem you're solving. Are you adding to, taking from, putting together, or taking apart? (You could also be comparing numbers)

Step number five: Solve the problem using a strategy.

SIX: Write an equation. That's when you write a number sentence with two equal sides, separated by an equal sign.

SEVEN: Label your answer.

EIGHT: Check your work. Make sure both sides of your equation are equal, and the number makes sense

Chorus

8 steps to solve word problems.
(Eight!)

Use them all and be
(Great!)

There is no time to
(Wait!)

Come on now!
(Eight!)

Come on now!
(Eight)

Let's name all eight.
(Let's name all eight)

Can you name all eight?
(I can name all eight)

Outro 2x

(One!) Visualize the problem.

(Two!) Retell the problem.

(Three!) Underline and circle.

(Four!) What type of problem are you solving?

(Five!) Use a strategy.

(Six!) Write an equation.

(Seven!) Label your answer.

(Eight!) Check your work.

3 Ways to Solve Word Problems

Types of Story Problems

Adding To

You start with _____ and more gets added.

Key Words: *altogether, in all, sum, total*

Taking From

You start with _____ and some gets taken away.

Key Words: *left, less, remains*

Putting Together

Putting groups together.

Key Words: *altogether, both, in all, sum, total*

Taking Apart

Taking groups apart.

Key Words: *left, less*

Comparing

Finding the difference.

Key Words: *more than, less than, difference*

**Unknown Variable

There is a missing piece at the beginning or in the middle of the problem.

Key Words: *some*

*2 Step Problems

There are two parts to the problem that need to be solved.

Look for two questions.

Visualize the Problem

Retell the Problem

Underline Key Words & Circle Key Numbers

Determine What Type of Problem You Are Solving

Types of Story Problems	
+ ADDING TO	You start with _____ and more gets added. Key Words: altogether, in all, sum, total
- TAKING FROM	You start with _____ and some gets taken away. Key Words: left, less, remains
+ PUTTING TOGETHER	Putting groups together. Key Words: altogether, both, in all, sum, total
- TAKING APART	Taking groups apart. Key Words: left, less
= COMPARING	Finding the difference. Key Words: more than, less than, difference
? UNKNOWN VARIABLE	There is a missing piece at the beginning or in the middle of the problem. Key Words: some
1, 2 MULTI-STEP	More than one step is needed to solve the problem. Key Words: then, after that, later

**PROBLEMS TO
1000**

The background features a large, light gray circle. Inside the circle, there is a trail of small stars leading to a larger star at the top right. The word 'CORE' is written in large, light gray, sans-serif capital letters across the bottom half of the circle.

Name: _____ Date: _____

2nd Grade Story Problems

1. Arthur blew 20 bubbles. Anthony blew 47 bubbles. How many bubbles did they blow in all?
