

RAINFOREST

VIRTUAL field trip

EMBARK ON A RAINFOREST ODYSSEY

- ✿ Travel the world to visit 3 Tropical Rainforests.
- ✿ Collect stickers to show progress.

JUNGLE ADVENTURES UNLEASHED

- ✿ Read passages
- ✿ Watch videos
- ✿ Complete interactive activities

CROSS-CURRICULAR VIRTUAL JOURNEY

✿ Aligns to NGSS Science Standards

✿ Cross Curricular:
Integrates reading,
social studies, and
writing

PROBOSCIS ADAPTATION

Almost all proboscis monkeys live on the island of Borneo in Southeast Asia, which sits on the equator. The monkeys live in the tropical rainforests that spread across the island, along with many other animals. Watch the video to learn about one special adaptation of the proboscis monkeys.

Why do the proboscis monkeys need to cross the river?

Why is it dangerous for them to swim across the river?

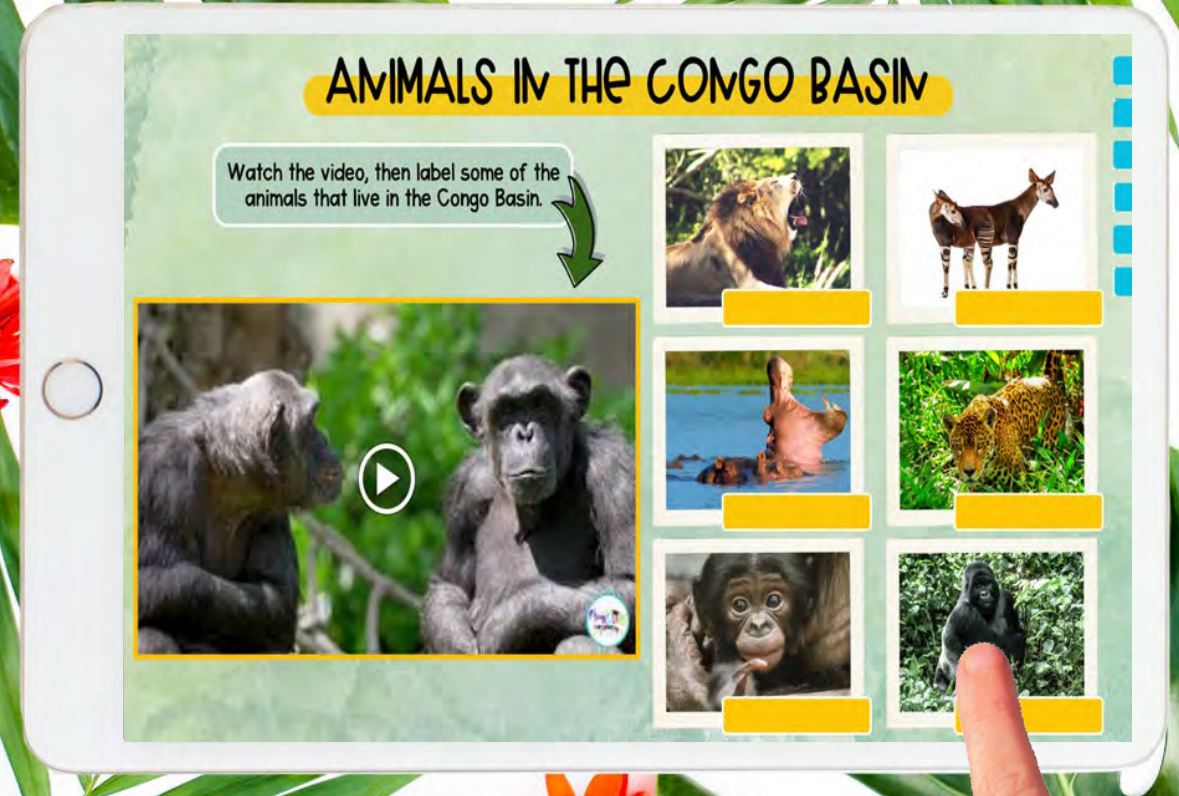

How have the proboscis monkeys adapted?

How does their adaptation help them survive?

TROPICAL CLIMATES

Tropical rainforests are nicknamed the _____ because of how much oxygen is produced by the millions of trees that thrive in them.

The climate in tropical rainforests are _____ and _____.

At the _____, the sun is the strongest. It strikes the Earth at 90°.

The weather near the equator stays the _____ all year round, while other parts of the Earth experience changing _____.

Fill in the blanks using the word bank. Then, move the Earth and the Sun to the box below to illustrate how the sun strikes the Earth's equator. Re-watch the video if you need help.

"the lungs of the world"
