ADDING & SUBTRACTING MULTI-DIGIT NUMBERS

addition and subtraction challenge

Directions:

1. Work in partners.
2. Cut out the cards on the following pages, keeping the number cards separate from the operation cards.
3. Shuffle the number cards and deal an equal amount to each player. Players leave their cards face down in a pile. Shuffle the operation cards and leave in one pile face down in the center.
4. For each turn, one operation card in the center is revealed. Players also turn over two of their number cards.
5. On your answer sheets, each player creates an addition or subtraction problem, according to the operation card for that turn, using your two numbers. Remember, if you are making a subtraction problem, your larger number needs to be the minuend.
6. Players solve their problems. The player with the larger answer wins one point.
7. Discard number and operation cards and repeat. The player with the most points at the end wins.
