Rhinos

Integrates Reading

Rhinos Charging

If a rhino hears an odd noise or feels confused or threatened, they will charge. This means they will run straight in the direction of the perceived threat, as fast as possible. They can run up to 40 miles per hour, so it is quite dangerous to be in the path of a charging rhino. Black rhinos are known for being the most aggressive species and charge more frequently than others.

Watch below as the photographer caught a little too close to a black rhino.

What did the photographer do to get away from the rhino? Why did it stop?

Engaging & Educational Media

Elephant vs Rhino

Directions: Watch the videos to see an elephant and rhino interact. Then, answer the questions.

1. Describe the rhino's horn.

2. How does the rhino defend itself?

3. Why does the elephant want to knock the rhino over?

*Please Note: Video links are provided with instructions to embed.

Research & Report Skills

Types of Rhinos

Directions: Explore this link to learn about the 5 different types of rhinos. Then fill out the chart below.

	White Rhino	Black Rhino	Greater One Horned Rhino	Sumatran Rhino	Java
Population					
Habitat					
Weight					

Copy and paste the stamp into your scrapbook.

Which type of rhino is the rarest?

*Please Note: Video links are provided with instructions to embed.

Interactive Slides

Rhino Lifecycle

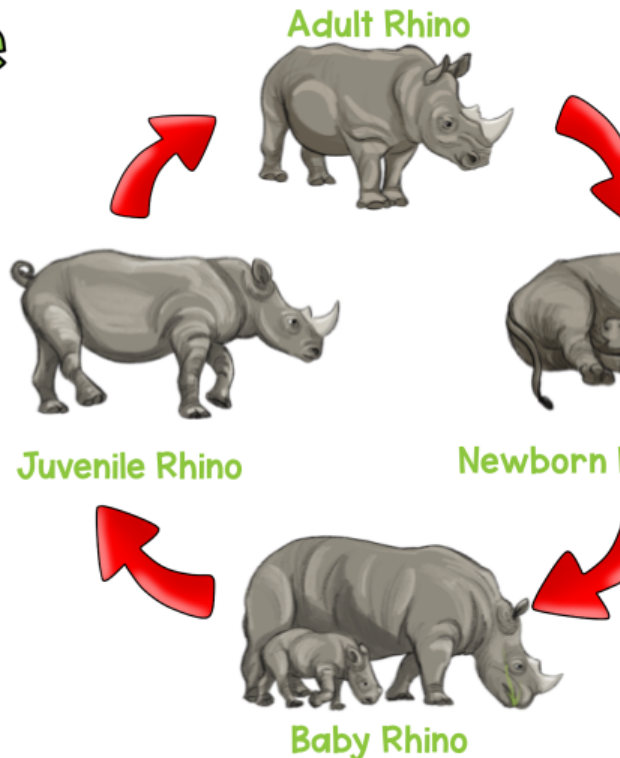

Directions: Watch a mother and baby at Kruger National Park. Then, drag and drop the images to complete the lifecycle.

Baby rhinos are called calves. They typically stay with their mother for two to five years. The mother protects the calf from predators such as lions and hyenas.

Copy and paste the stamp into your scrapbook.

Critical Thinking

Rhinos in Danger

One thing almost all types of rhinos have in common is that they are endangered. No other animals hunt or kill rhinos, so the biggest threat to them is humans. Watch the video below to learn more about what is happening to rhinos.

Copy and paste the stamp into your scrapbook.

It has been more than 20 years since the last Javan rhino was poached! Click here to read more.

How many Javan rhinos are left?
