How To Use This Activity

This resource includes four website links for each differentiated Digiscape. Share the link for the Digiscape you would like your students to use.

- You may share the link via an LMS your school uses such as Google Classroom or through email.

Your students will complete the Digiscape. The resource will prompt your students if their answers are correct or incorrect. If you would like your students to report their work to you, you can have them share a screen shot of their final decorated tree or share their scrap paper.
